Jsmm R-package installation

To install the R package, run the following commands on R:

```
install.packages("remotes")
remotes::install_github("lufrodriguezca/Jsmm")
```

scripts_simulated folder

Contains scripts for performing all the workflow of the Jsmm R-package (Fig. 1B main manuscript) for a simple example with a square domain. The Vignettes explaining step by step this example can be found in the Supporting Information S2.

scripts_moths folder

Contains scripts for performing all the workflow of the Jsmm R-package (Fig. 1B main manuscript) for the main example in the manuscript.

The empirical data used in the main example in the manuscript was originally published by Slade et al., 2013 and used as a case study in Ovaskainen et al., 2019.

The air temperature covariate data used in the main example in this manuscript were originally published by Rennie et al., 2017 :

Supporting_information_S2.pdf file

Vignettes demonstrating the application of the R-package Jsmm.
